About

Seasoned software engineer with over a decade of experience specializing in frontend development. Throughout my career, I have honed my skills in JavaScript, particularly leveraging Angular and ReactJS to build responsive and dynamic user interfaces. I am passionate about crafting elegant solutions that enhance user experience and drive business objectives.

In addition to frontend expertise, I also possess a strong foundation in backend development with Node.js and have dabbled in Python for various projects. This diverse skill set allows me to contribute effectively across the full stack, from designing intuitive interfaces to optimizing server-side performance.

Education

Bachelor's degree Computer Science
Universidad de La Guajira
Riohacha, Colombia
2008 – 2013

Professional Experience

Lead Software Engineer
Aug 2022 – Apr 2024
Softserve - Full-time
Austin, Texas, United States - Remote

Responsible for designing high-impact solutions that fully satisfy the needs of clients, while fostering an environment of trust and camaraderie within the work team. In this way, we can obtain the necessary synergy to meet objectives within the established times and providing quality at a high level.

Senior Software Engineer
Jun 2021 – Jul 2022
MAS Global Consulting - Full-time
Tampa, Florida, United States - Remote

As a Senior Software Engineer, I collaborated extensively across diverse teams, playing a key role in designing, building, deploying, and maintaining software products. Leveraging my expertise in React JS, HTML/CSS, and frontend technologies, I led the development of robust and scalable solutions. Additionally, I took an active role in mentoring team members and developers across the company, fostering skill development and knowledge sharing to drive continuous improvement and innovation.

Senior Software Engineer
Jul 2020 – Jun 2021
Asesoftware - Full-time
Bogotá, Colombia - Remote

As a Frontend Software Engineer, I was responsible for analyzing requirements, designing and building user interfaces from scratch, and maintaining software products across various client projects. Leveraging technologies such as Angular, JavaScript, and HTML/CSS, I created intuitive and responsive user interfaces that met the specific needs of different company clients. Additionally, I collaborated effectively across multiple teams to ensure seamless integration and delivery of high-quality solutions.

Mid Software Engineer
Aug 2018 – Jul 2020
Grupo Empresarial TIC - Full-time
Barranquilla, Colombia - On Site

As a Frontend Engineer, i played a key role in designing, creating, and maintaining a medical software application. Additionally, I took on the responsibility of mentoring another developer who focused on creating the mobile app version. The technology stack utilized for this project included Angular, JavaScript, Ionic, and Python. Through effective collaboration and mentoring, we successfully delivered a comprehensive medical software solution across web and mobile platforms, leveraging a versatile tech stack to meet the unique needs of healthcare services

Full Stack Developer
Jun 2012 – Jul 2017
Guajira University - Full-time
Riohacha, Colombia - On Site

I served as a Full Stack Software Engineer for over 5 years, specializing in the design, development, and maintenance of software products using PHP, Laravel, and MySQL. I led the development lifecycle from architecture design to implementation, ensuring the creation of robust backend systems and database solutions. My role involved building scalable and efficient applications that aligned with business requirements, demonstrating proficiency in PHP frameworks and database management.
